Cole M. Speed – Curriculum Vitae

Address The University of Texas at Austin
Jackson School of Geosciences
2275 Speedway, Stop C9000
Austin, Texas 78712-1722

Email cole.speed@beg.utexas.edu

Education

2018-Pres. **Ph.D. Geological Sciences**, Jackson School of Geosciences, University of Texas at Austin
Research Theme: Earth/Planetary Surface Processes and Remote Sensing
Co-advisors: Zoltán Sylvester, David Mohrig
Cumulative GPA: 4.0/4.0

2017 **B.S. Geophysics**, Jackson School of Geosciences, University of Texas at Austin
Honors Thesis: *High-resolution stratigraphic analysis of the East Texas Inner-continental shelf*
Advisor: Sean Gulick
Cumulative GPA: 3.71/4.0 (High Honors)

Relevant Coursework Applied Geocomputation, Python in Geoscience Research, Remote Sensing for Geoscientists, Scientific Programming (C++/Fortran), Scientific/Technical Computing, Machine Learning Applications in Geosciences, High Performance Computational Engineering

Research Experience & Projects

Morphologic, Topographic, and Stratigraphic Evolution of Modern Fluvial Landscapes
Coupling time-lapse satellite imagery, co-located topographic (lidar) data, and simple numerical models to quantify linkages between plan-form river bend kinematics and topographic and stratigraphic evolution. Developing Python-based approaches for quantifing and predicting the evolution of fluvial landscapes in the modern.
Conference Abstract | Github

Preservation and Exhumation of Fluvial Landscapes in the Ancient Stratigraphic Record
Integrating 3-D digital outcrop models, lidar-derived digital terrain models, and field data to quantify linkages between fluvial processes and stratigraphic products, and to constrain the preservation and evolution of ancient fluvial landscapes on modern planetary surfaces.
Conference Abstract | Lidar Data (OpenTopography) | News

Automated Identification of Dune Fields on Mars using Deep Learning
Developing approaches for the identification and classification of geomorphic features - currently dune fields - on the surface of Mars using a convolutional neural network (U-Net) and a high-resolution global mosaic of images acquired by the Thermal Imaging Emission System (THEMIS) on board the Mars Odyssey orbiter.
Github | Jupyter Notebook

Stratigraphic Preservation of a Coastal Plain Fluvial Landscape on the Gulf of Mexico Continental Shelf
Integrated high-resolution 2-D multi-channel seismic reflection and CHIRP data using Landmark DecisionSpace software to investigate fluvial and marine processes and preservation on the Texas continental shelf
Manuscript

Technical Skills

Programming: Intermediate to advanced skills in Python applied to geospatial and image analysis
Packages/Interfaces: Jupyter, OpenCV, rasterio, PIL, LASTools, Google Earth Engine API| Jupyter Notebooks
Geospatial: Advanced skills in ArcGIS/QGIS (GUI and Jupyter interface), intermediate skills and experience in CloudCompare, Pix4D, and ENVI | Projects

Peer-Reviewed Journal Articles

Published

Speed, C.M., Swartz, J.M., Gulick, S.P.S., Goff, J.A. (2022) Seismic expression and stratigraphic preservation of a coastal plain fluvial channel belt and floodplain channels on the Gulf of Mexico inner continental shelf. *Sedimentology*. doi:10.1111/sed.13044

In Prep

Speed, C.M., Sylvester, Z., Morris, P., Mohrig, D. Linkages between bend cutoff style, geometry, and channel bend migration patterns in meandering rivers.

Speed, C.M., Shen, Y., Xie, Y., Automated Detection and Classficiation of Martian Dune Fields Using a Convolutional Neural Network.

Speed, C.M., Sylvester, Z., Mohrig, D., Styles of Cutoff-Related Channel Migration and Depositional Patterns in Meandering Rivers: Examples from the Trinity River, Texas.

Speed, C.M., Sylvester, Z., Flaig, P.P., Durkin, P.R., Goudge, T.A., Recognition, Characterization, and Interpretation of a River Avulsion Node in the Cretaceous Cedar Mountain Formation, Utah, USA: Implications for Stratigraphic Preservation of Avulsion Processes.

Presentations

Research Grants

2019 The Institut Français du Pétrole Grant
2018 Graduate Student Seed Proposal Grant, National Center for Airborne Laser Mapping
2018 University of Texas Provost Supplement Fellowship
2015 Wayne Franklin Bowman Endowed Presidential Scholarship

Professional Experience

May 2022 - Aug. 2022 **UNAVCO**, Boulder, Colorado
Data Science Intern, OpenTopography

- Built Python workflows for accessing, processing, analyzing, and visualizing high-resolution 3-D topographic datasets. (Link to Jupyter Notebooks)
- Enabled cloud-based access using AWS to make accessing large quantities of lidar data more efficient.
- Developed, documented.and deployed Jupyter Notebooks for user access.

June 2021 - Aug. 2021 **Chevron**, Gulf of Mexico Business Unit, Houston, Texas
Earth Science Intern, Exploration & Appraisal

- Identified and characterized resource and potential of two prospects in the deepwater Gulf of Mexico
- Worked with SMEs to analyze reservoir, seal, and charge and constructed risk profiles for prospects
- Develop scoping-level economics and provided final recommendation to exploration team

June 2020 - Aug. 2020 **Chevron**, Gulf of Mexico Business Unit, Covington, Louisiana
Earth Science Intern, Geology & Geophysical Operations

- Constructed structural and petrophysical models of key fields across the U.S. Perdido Fold Belt in the Alaminos Canyon protraction area, Gulf of Mexico, using 3-D seismic and petrophysical log data
- Performed model refinement and quality control using blind well test to ensure model accuracy for petrophysical property prediction
- Applied model results to generate pore pressure and fracture gradient curves to support current and upcoming well planning and drilling

May 2017 - Aug. 2017 **EOG Resources**, San Antonio, Texas
Geophysics Intern

- Integrated 3D seismic data, well logs, and seismic inversion products to characterize the morphology, distribution, and lithologic properties of key subsurface formations across acreage
- Performed statistical analysis of fracture parameters and well performance in the Eagle Ford Fm., TX
- Combined geophysical characterization with well performance data to identify future drilling locations

Teaching Experience

Fall 2022 **Co-leader**, Field course in process sedimentology and stratigraphy, Utah

Fall 2022 **Teaching Assistant**, Python for Geoscience Research, UT-Austin

Spr. 2022 **Teaching Assistant**, Introduction to Remote Sensing for Geoscientists, UT-Austin

Fall 2021 **Teaching Assistant**, GIS/GPS Applications in Earth Sciences, UT-Austin

Fall 2020 **Teaching Assistant**, GIS/GPS Applications in Earth Sciences, UT-Austin

Fall 2019 **Teaching Assistant**, Sedimentary Rocks, UT-Austin

Workshops and Short Courses

Oct. 2019 **From point clouds and full-waveform data to DEM analysis**, Potsdam, Germany
Processing and analyzing lidar/SfM point clouds and derivatives applied to earth surface processes

Oct. 2019 **Salt and Extensional Tectonics in the Paradox Basin**, Utah, USA
Hands-on training in recognition and interpretation of salt tectonic structures and their implications

May. 2019 **SEPM Deep-water Depositional Environments: Processes and Products**, Austin, Texas
Classroom instruction and exercises related to turbidity currents and their deposits in the subsurface

Field Experience

Oct. 2018 Stratigraphic section mapping and surveying in the Cedar Mountain Fm., Green River, Utah
Oct. 2018 Shallow marine and continental slope sedimentary systems, Cape Arago, Oregon
Jul. 2016 Geophysical surveying in the Española Basin, New Mexico
Jun. 2016 Marine Geology and Geophysics (MG&G) field course, R/V Manta, Gulf of Mexico

Organizational Leadership

2018-2020 **President**, AAPG Student Chapter
2016-2018 **Treasurer**, SEG Student Chapter

Current Research Group Affiliations

Quantitative Clastics Laboratory Consortium | Quantitative Sedimentology and Morphodynamics Research Group
